Agile Digital Workplace

from etiCloud

Access Practice/Case Management Systems and legal applications quickly and securely, anytime, anywhere – enabling a truly Agile Digital Workplace to improve cost and time efficiencies.

Computing and the legal industry

When it comes to the computing experience in your firm, how easy is it for you to access the PMS, CMS and relevant applications? Chances are you're rolling your eyes because it's probably a little hit and miss. Right?

If you're office-based, do you find yourself turning on your laptop and heading to the kitchen to make coffee while the system loads? When you're travelling on a train, do you have to wait ages to open a single file? And if you're working from home, do you get frustrated with how long it takes to send an email? Have you simply got used to circumventing the workflow to allow for inefficiencies in the existing IT system?

Many UK law firms employ a range of functionality to deliver IT. A mix of Cloud, on-premise and legacy systems, all evolving over time, can lead to an inefficient and cumbersome platform that is simply not fit for purpose.

This poses challenges for everyone from end users to IT teams:

1. Difficulty in accessing information quickly and reliably, irrespective of whether you're in the office or on the move

2. Different passwords for different systems

3. Inadequate cybersecurity protocols for remote working access

Having fast, uniform, secure and reliable 'round-the-clock' access to the information you need to do your job efficiently and effectively is imperative for commercial success. Whatever location you find yourself in, you need data, client files, the CMS, timesheets/logs and everything in between instantly at your fingertips. Not possible? Think again. With etiCloud Agile Digital Workplace you can have all of this, and more, in one single place.

Digital Agility Benefits

Not only will the etiCloud Agile Digital Workplace remove frustrations associated with the current IT experience for everyone, it can also ensure your team never misses a billable hour ever again. Your firm will be more efficient and effective thanks to faster access for all users, plus client data will be more secure than ever before.

Cost efficient

- Invoice closer to case/experience

- Removes the capital expenditure associated with non-core operational services – providing cost certainty.

- Fixed cost for the business – save money in the long-term

- Improved cashflow and financial planning

- Modular, wrap-around service to specific requirements

- Potential to reduce PI premiums and cybersecurity insurance

Increased Productivity

Easy entry into all apps and software used by the business

Aids in more streamlined workflow

Drives statistical reports to provide increased level of management information for key decision makers

Agile, efficient and easy-to-use

Enhanced Security

Instant, secure and dependable accessibility to information and data on the move

Support and boost fulfilment of SLAs

Purpose built Private Cloud Platform

All data is housed in UK-based IBM Tier 4 ISO 27001 Datacentres
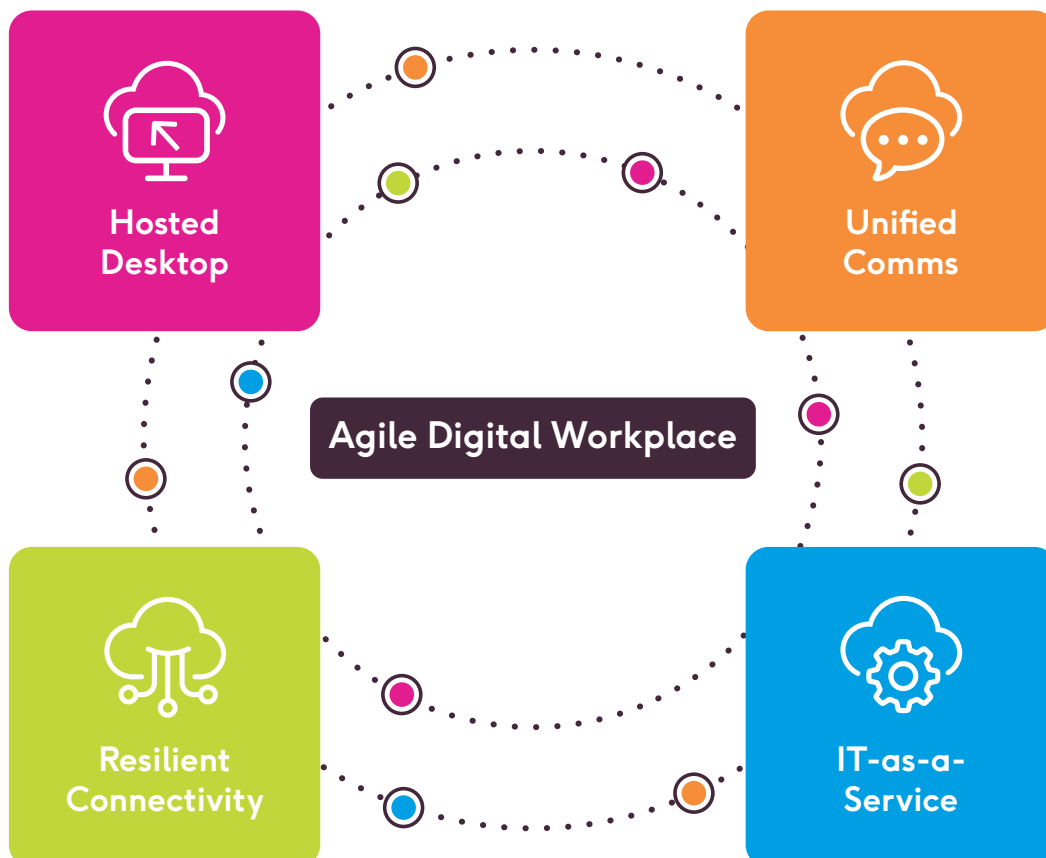

Email protection built-in

Enabling an Agile Digital Workplace

The etiCloud Agile Digital Workplace is a private business environment that enables the development of highly efficient workflows and delivers uniformity for every single member of your team.

A fully bespoke solution, it supports all legal practice case and document management systems and all types of software. It also offers the opportunity to integrate any existing telephone system to create the optimum office and mobile working environment.

Resilient Connectivity

IT-as-a-Service

90 Day Assurance

Once you've tried our Agile Digital Workplace, you'll never look back. Fact. So confident are we that you'll be totally satisfied with the solution, we'll offer you a 90-day money back assurance.

Seriously, think about this for a second. Migrating IT services over to a new system is the most difficult time for us, and you for that matter. Once the clock starts ticking and our expert team is in the process of making the switch, we'll put our necks on the line at this most critical time. At this point and for a whole 90 days, we're saying you can change your mind if you're not happy.

What's the point of our 90-day assurance? Nobody ever wants to make a wrong decision, but if you feel you may have, with etiCloud there is a way out. We aim to make it easier for you to make the right decision. We totally understand it's often tricky to get everyone on the same page. So, we aim to make it easier to get board approval. Therefore, if you're not 100% satisfied within the 90-day assurance period, where you feel it's necessary, we'll refund set up costs, terminate any contract you have with us AND help you move to another solution.

One last thing. Don't be surprised by the affordability of the etiCloud Agile Digital Workplace; we'll be the most cost-effective option on the table.

90 DAY
MONEY-BACK PROMISE

Who are we?

We're specialists in building bespoke cloud-hosted services that meet our clients' specific needs and business objectives. It's our role to create public, private and hybrid cloud solutions that are entirely scalable and offer multiple benefits to Law firms and legal service companies. Every product we design and implement, be it a hosted desktop or unified communications system, will enable your business to generate cost savings, improve productivity and enhance efficiency. What's not to like!
